## Laser & Vein Treatment Center

 MidState Medical Group

If you want to eliminate unsightly veins, remove hair, or erase age and sunspots, our physician at The Laser & Vein Treatment Center can offer a procedure that is just right for you. In addition to laser applications for leg and facial veins, the center also offers total vein care for those conditions that may be more complex. To schedule an appointment, call 203-238-2691.

### DANIEL S. SCHWARTZ, MD, FACS

Dr. Schwartz, an established general and vascular surgeon, has been practicing in the greater Meriden area for the past 25 years. He has been treating varicose veins with a variety of state-of-the-art minimally invasive techniques, including LASER treatments.

A graduate of Franklin & Marshall College, he received his medical degree from The Chicago Medical School and completed his residency training at the Long Island Jewish Medical Center. He then completed a post-doctoral fellowship in cardiovascular surgery at the Baylor College of Medicine in Houston, Texas.

Dr. Schwartz is a Fellow of the American College of Surgeons, a diplomat of the American Board of Surgery and a member of the New England Society for Vascular Surgery, The Michael E. DeBakey International Surgical Society and the Alpha Omega Alpha Honor Medical Society.

### LASER TREATMENT OPTIONS

Laser treatments can be used for the following:

- Hair reduction of the face, back, legs, arms and bikini area
- Shaving bumps
- Red and blue facial and leg veins
- Port wine stains (blue and purple)
- Vascular legions
- Pigmented legions
- And a variety of other conditions

### FREQUENTLY ASKED QUESTIONS

#### How many treatments will I need?

**Veins**—Between 3 and 6 treatments, 8 -10 weeks apart.

**Hair**—Several treatments, every few weeks; 1 to 2 touch-up treatments per year.

**Sun/Age spots/Rosacea**—Usually 4-6 treatments, 4-6 weeks apart.

**Enhanced skin rejuvenation**—Between 3 and 8 treatments.

**Is it painful?** For vein and hair treatments, a topical anesthetic is usually recommended prior to each treatment. An anesthetic is usually not necessary for other applications.

#### What should I expect after my treatment?

Redness and swelling is temporary. There is no downtime, but we recommend limited sun exposure for one week following treatment. For pigmented lesions, one can expect initial darkening and eventual crusting of each spot, following by lightening within a few days.

### NON-LASER VEIN TREATMENT OPTIONS

Based on a personal evaluation, there are several non-laser options available to treat problem veins. These include injections, surgical removal, and a state-of-the-art procedure using radio frequency waves. Our physician will help you decide the most appropriate choice for you.
